CUSTOMER'S PRODUCT NAME :

TDK PRODUCT NAME :

DC-DC CONVERTER UNIT CC10-xxxxxF-E Series

TDK·Lambda

TDK Corporation Power Systems Business Group

DWG.No. TRSA-0288-3

Revised 2006/12/01

1. Part Name

The part name is the $\underline{CC10}-xxxxF-E$ Series.

2. Contents

SAFETY INSTRUCTIONS

Please be sure to read these instructions for safe design when using the product. Improper use may pose the danger of smoke or fire.

CAUTION Notes

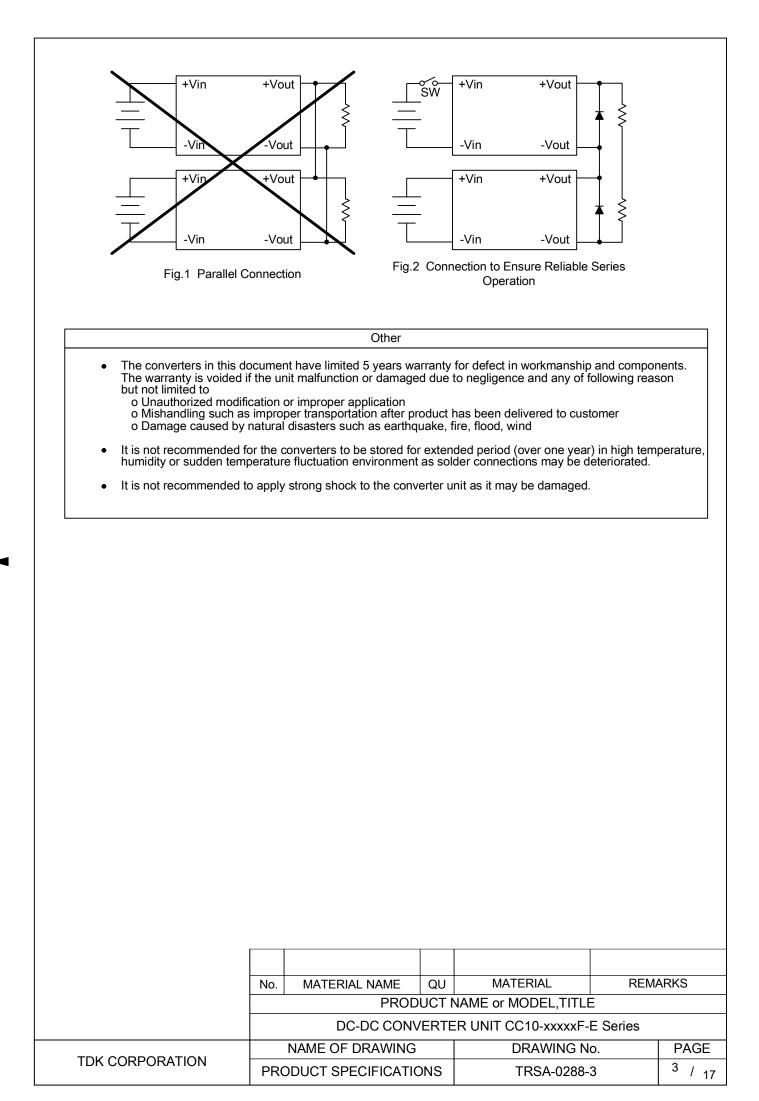

Storage

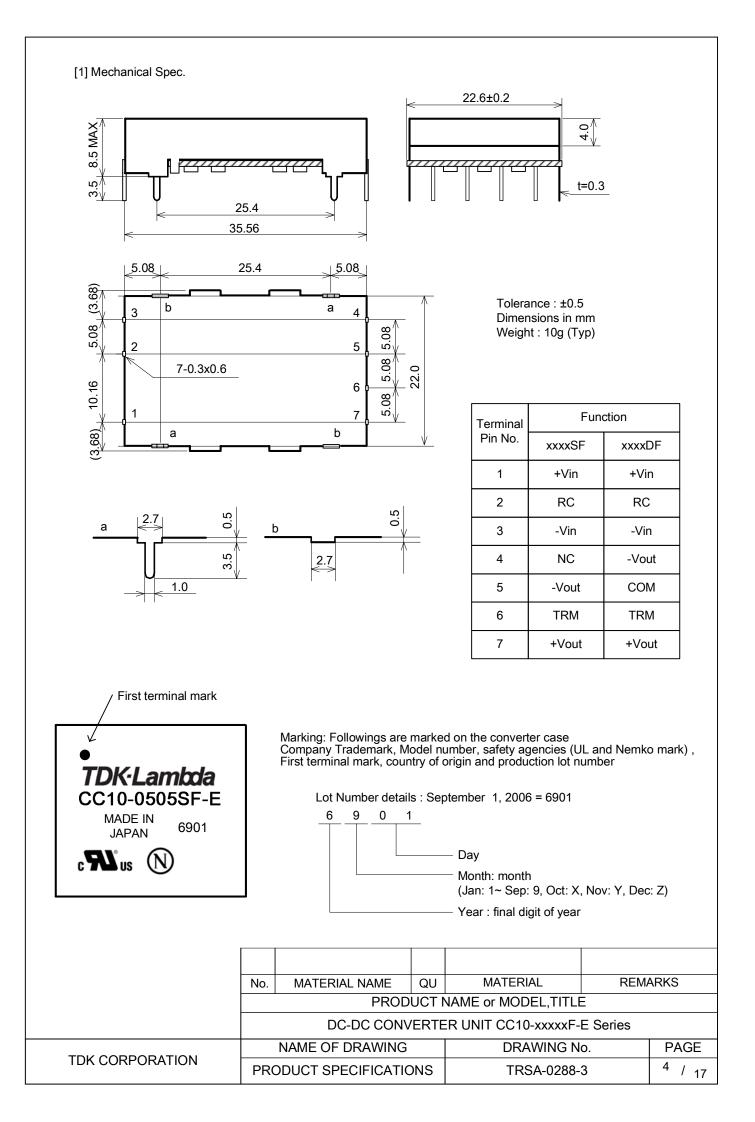

- Store the converter unit in the manner specified in the purchase specifications or catalog.
- Do not store the converter unit in a corrosive gas or corrosive dust environment.
- Do not store the converter unit in a strong electrical or magnetic field. It will cause damage.

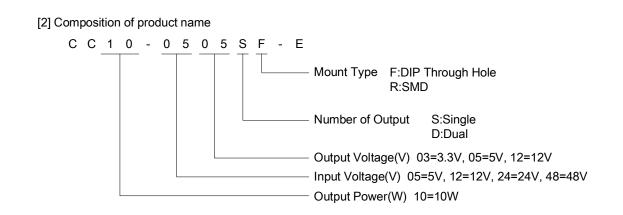

Environment & Conditions of Use

- Do not operate the converter unit in a corrosive gas or corrosive dust environment.
- Operate the converter unit in the environment and under the conditions specified in the purchase specifications or catalog.
- Operate the input and output voltage, output current, etc. within the rated electrical specifications.
- This converter has no built-in over voltage protection.
- A continuous over current condition may damage the converter.
- This DC to DC converter has a built-in input fuse, over current of any kind will cause the input to open.
- Be sure to insulate the metal case bottom from surrounding components and trace pattern.
- Do not operate the converter unit in a strong electrical or magnetic field.
- If there is the possibility of surge voltages occurring, take surge voltage prevention countermeasures.
- The metal case of this DC to DC converter is insulated from internal components.
 However, if high voltage parts contact the metal case, it may damage the internal components.
- Do not change or modify the product ,
- TDK will not be responsible for any damage due to modification.
- Do not remove or disassemble the case.
- The converter unit is not designed to be resistant to radiation.
 Do not use it in nuclear power controls, medical equipment, etc.
- Give due design consideration for safeguarding against personal injury, fire and other accidents.
- The converter unit must be wired according to the measurement circuits given in the purchase specifications or catalog.
 Consult TDK concerning any other connection schemes in order to avoid possible damage.
 These converter units cannot be connected in parallel (Fig.1).
- These converters may be connected in series, to ensure reliable operation, TDK recommends the connection shown in Figure 2.
 The output current must not exceed the rated current of the smaller converter
 - The output current must not exceed the rated current of the smaller converter unit.
- Consult us when using this product in vehicles or in an environment where vibration is regularly applied.

^{*1} Total output voltage range.

^{*2} Input Voltage : Vin = min.~ max., lout = max., Topr = 25°C Output Current : Vin = typ., lout = 0 ~ max., Topr = 25°C Products with Two Outputs: at Balanced Load (the +output and -output load currents are in equal condition) Temperature : Vin = typ., lout = max., Topr = -40 ~ +50°C *³ Measured with a 50MHz Bandwidth oscilloscope

 *4 Vin = typ. lout = max.

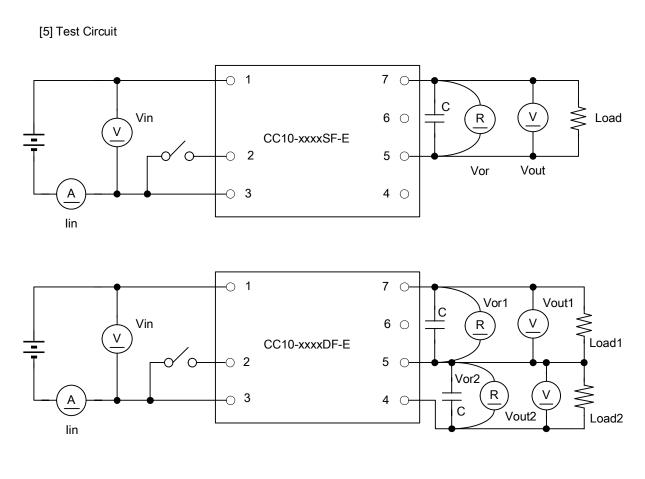

^{*5} Dual outputs units can be used as a single output units with output voltage range of 24 ~ 30V when output return (COM) is not used.

^{*6} When using the 15V output, short the Vout and TRM terminals.

^{*7} The output voltage can be varied as follows:

3.3V: 3.15~3.6V 5V: 4.75~6V 12V: 11.4~15V ±12V: ±11.4~±15V (22.8~30V)

[6] Reliability

Item	Test Conditions	Criteria
High Temperature	Temperature : 50 ⁺⁵ ₋₀ °C Time : 1000 hours Operation : Vin : Typcal Load = Maximum	
Heat Shock	Low Temperature : -40 ^{±0} / ₋₃ °C High Temperature : +85 ⁺³ °C 100cycles	
Humidity	Temperature: $60^{+5}_{-0} \circ C$ Humidity: $90 \sim 95\%$ R.HTime: 1000 hoursOperation: Vin = Rated Input, Load = Minimum	No abnormality in electrical characteristics or external appearance,
Vibration	Frequency : 10~55Hz Sweep Time : 15 minutes Amplitude : 1.52mmp-p Vibration Time : 2 hours each in X,Y and Z directions	either before or after, the test.
Shock	Peak Acceleration : 100G Duration of the pulse : 6msec Number of test : 3times in each axis for total of 18 times	
High Temperature Storage	Temperature:85°C Time :1000 hours	
Solderability	Temperature:245±5°C Time :5±1s	80% or more must be covered with new solder
Lead Strength	Tensile Strength :5N 10±1s Torsion Strength :2.5N	There must be no breakage or loosening.
Low Temperature Start	Temperature : -40±3°C Time : 72 hours	Normal start.

[7] Soldering Condition

Dip Soldering : 260°C 10sec. max. Hand Soldering : 380°C 3sec. max. (soldering iron)

[8] Functions

8-1. On/Off function(RC)

The converter can be turned on or off by using RC terminal(2 pin).

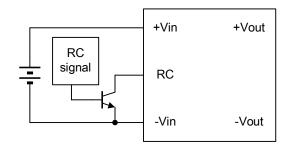

On function / Start operation: RC terminal is Low (0 ~ 0.4 with respect to -Vin)

Off function / Stop operation: RC terminal is Open or High

Note:

RC Current : external circuitry requires to sink maximum of 1mA during on function.

RC Voltage: Maximum voltage is +Vin Output voltage can be adjusted up or down by connecting a resistor between Output TRM pin and the output (+Vin or -Vin) as shown below.

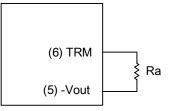

8-2. Output Voltage Adjustment

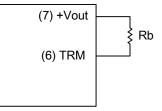

It is possible to adjust the output voltage as shown below by connecting the TRM terminal to the -Vout terminal. When you don't want to adjust the output voltage, open the TRM terminal.

Product	Open	Short to -Vout terminal
CC10-xx03SF-E	3.3V	3.6V
CC10-xx05SF-E	5.0V	6.0V
CC10-xx12SF-E	12.0V	15.0V
CC10-xx12DF-E	±12.0V	±15.0V

	No.	MATERIAL NAME	QU	MATERIAL	REMA	ARKS
		PROD	UCT I	NAME or MODEL, TITLE		
		DC-DC CONV	'ERTE	R UNIT CC10-xxxxF-	E Series	
		NAME OF DRAWING		DRAWING N	0.	PAGE
TDK CORPORATION	PR	DUCT SPECIFICATIO	ONS	TRSA-0288-3	3	¹⁰ / ₁₇

It is possible to adjust the output voltage by connecting a resistor between the TRM terminal and either the -Vout terminal or the +Vout terminal as shown below.

Increase output voltage

Decrease output voltage

Connect resistor(Rb) between TRM(6)and +Vout(7) as below formula.

CC1R5-xx03SF-E	Vout = 3.3 - 15.53 / (39.6 + Rb)	Rb ≧ 62 The range of the change
00 m0-20000 -E	Rb = 15.53 / (3.3 - Vout) - 39.6	is up to 3.15V.
CC1R5-xx05SF-E	Vout = 5.01 - 52.55 / (31.8 + Rb)	Rb ≧ 160 The range of the change
CC1R5-33055F-E	Rb = 52.55 / (5.01 - Vout) - 31.8	is up to 4.75V.
CC1R5-xx12SF-E	Vout = 12.01 - 431.1 / (57 + Rb)	Rb ≧ 620 The range of the change
001R3-201231-L	Rb = 431.1 / (12.01 - Vout) - 57	is up to 11.4V.
CC1R5-xx12DF-E	Vout = 12.02 - 968.5 / (103 + Rb)	Rb ≧ 1500 The range of the change
GUING-XX IZDF-E	Rb = 968.5 / (12.02 - Vout) - 103	is up to 11.4V.

Connect resistor(Ra) between -Vout(5) and TRM(6) as below formula.

CC1R5-xx03SF-E	Vout = 3.3 + 9.59 / (32 + Ra)
00 INJ-22033I -L	Ra = 9.59 / (Vout - 3.3) - 32
CC1R5-xx05SF-E	Vout = 5.01 + 17.64 / (17.8 + Ra)
CCTK3-XX053F-E	Ra = 17.64 / (Vout - 5.01) - 17.8
CC1R5-xx12SF-E	Vout = 12.01 + 50.53 / (16.9 + Ra)
001R3-XX1231-L	Ra = 50.53 / (Vout - 12.01) - 16.9
CC1R5-xx12DF-E	Vout = 12.02 + 53.55 / (18 + Ra)
CCTR3-XXT2DT-L	Ra = 53.55 / (Vout - 12.02) - 18

<u>Caution : Do not use the converter over its rated output power; care must be taken</u> when output voltage is adjusted up as it could significantly affect output power.

8-3. Output Over Current Protection (OCP) :

OCP is activated when output Over Current (OC) is detected (105 to 250% of nominal output current). Converter is auto recovery, if OC is removed.

However, manual recovery is necessary if OC condition continues for more than 30 sec. If auto recovery is not activated for some reason, please shout off the converter and restart the converter. If you require the converter to be latched up during over current condition, please consult your TDK representative for recommendation of adding an external circuitry to RC terminal.

8-4. Output Over Voltage Protection :

This converter does not have an output over voltage protection function.

Consult your TDK representative for recommendation of adding external circuitry to RC terminal.

8-5. Output Under Voltage Protection :

This converter does not have an output over voltage protection function.

Consult your TDK representative for recommendation of adding external circuitry to RC terminal.

8-6. Under Voltage Lock out :

This product is equipped with a low input voltage protection circuit in order to prevent miss-operation when the input voltage is low. The converter stops operating when it falls below the voltage setting. The setting range is shown in the table below.

Product	Low Input Voltage Protection Setting Range
CC10-05xxxF-E	3.3~4.5V
CC10-12xxxF-E	6.0~9.0V
CC10-24xxxF-E	13.0~18.0V
CC10-48xxxF-E	27.0~36.0V

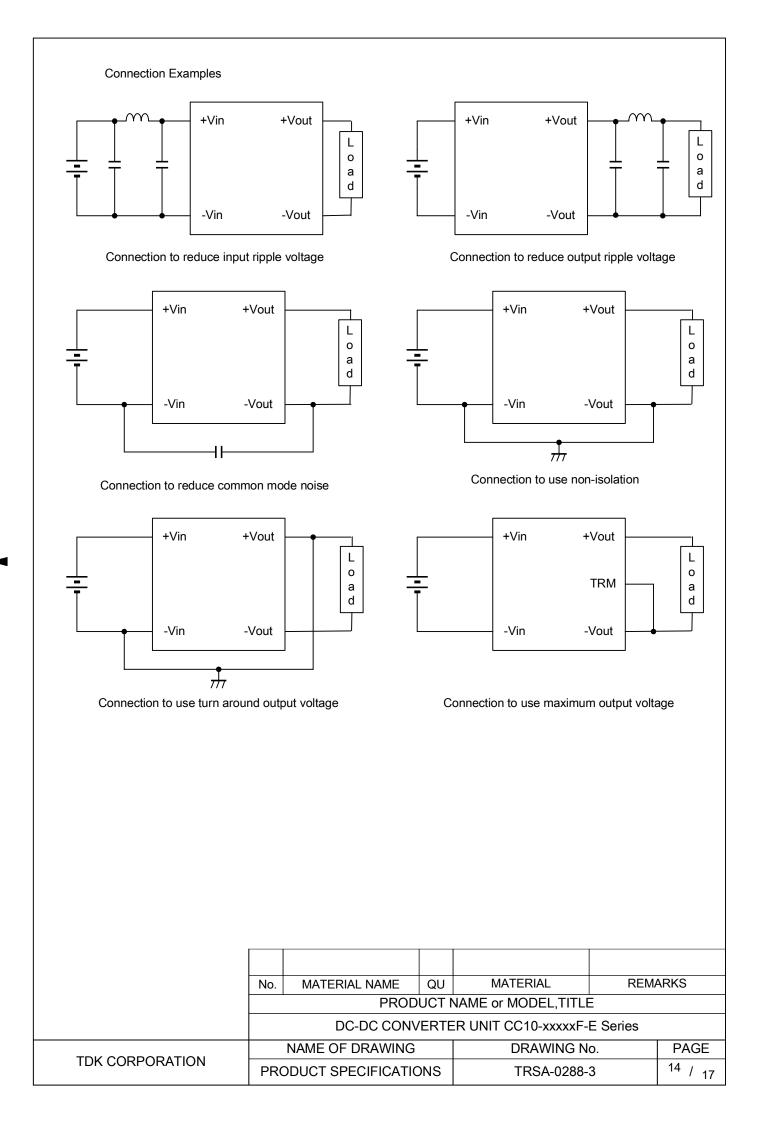

8-7. Input Circuit Protection :

The converters are equipped with input fuse. Fuses rating and capacity are shown in below table

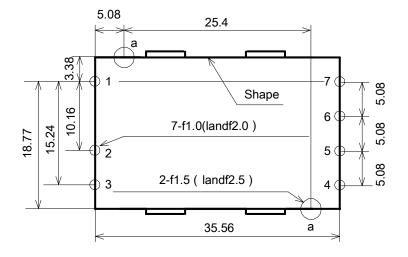

Product	Rated Current	Fusing Current
CC10-05xxxF-E	10A	20A or more
CC10-12xxxF-E	5A	10A or more
CC10-24xxxF-E	2.5A	5A or more
CC10-48xxxF-E	1.25A	2.5A or more
