

The SP8402 is a very low phase noise divider which divides by powers of two. The S0, S1, S2 data inputs select the division ratio in the range 2^1 to 2^8 . Special circuits techniques have been used to reduce the phase noise considerably below that produced by standard dividers. The data inputs are CMOS or TTL compatible.

The SP8402 is packaged in a 28 pin plastic SO package to be compatible with the SP8400 and SP8401 devices.
