## Single Low Noise Operational Amplifier

The NE/SA/SE5534/5534A are single high-performance low noise operational amplifiers. Compared to other operational amplifiers, such as TL083, they show better noise performance, improved output drive capability, and considerably higher small-signal and power bandwidths.

This makes the devices especially suitable for application in high quality and professional audio equipment, in instrumentation and control circuits and telephone channel amplifiers. The op amps are internally compensated for gain equal to, or higher than, three. The frequency response can be optimized with an external compensation capacitor for various applications (unity gain amplifier, capacitive load, slew rate, low overshoot, etc.).

### Features

- Small-Signal Bandwidth: 10 MHz
- Output Drive Capability:  $600 \Omega$ , 10 V<sub>RMS</sub> at  $V_S = \pm 18$  V
- Input Noise Voltage:  $4 \text{ nV}/\sqrt{\text{Hz}}$
- DC Voltage Gain: 100000
- AC Voltage Gain: 6000 at 10 kHz
- Power Bandwidth: 200 kHz
- Slew Rate: 13 V/ $\mu$ s
- Large Supply Voltage Range:  $\pm 3.0$  to  $\pm 20$  V
- Pb-Free Packages are Available

### Applications

- Audio Equipment
- Instrumentation and Control Circuits
- Telephone Channel Amplifiers
- Medical Equipment

Output Short-Circuit Duration (Note 2)	-	Indefinite	-
Lead Soldering Temperature (10 sec max)	$T_{sld}$	230	°C

Stresses exceeding Maximum Ratings may damage the device. Maximum Ratings are stress ratings only. Functional operation above the Recommended Operating Conditions is not implied. Extended exposure to stresses above the Recommended Operating Conditions may affect device reliability.

1. Diodes protect the inputs against overvoltage. Therefore, unless current-limiting resistors are used, large currents will flow if the differential input voltage exceeds 0.6 V. Maximum current should be limited to  $\pm 10$  mA.
2. Output may be shorted to ground at  $V_S = \pm 15$  V,  $T_{amb} = 25^\circ\text{C}$ . Temperature and/or supply voltages must be limited to ensure dissipation rating is not exceeded.
